

AURA TYCOON

Comprehensive User Manual for Students & Parents (IGCSE)

***Our Story & Purpose:** Aura Tycoon is a 100% free, non-commercial educational web app. It was originally developed by a parent wanting to guide their own child's study habits. By turning revision into a fun, rewarding experience, students earn "Aura Points" which they can exchange with their parents for real-life rewards!*

1. Navigating the Dashboard

After logging in with your Google account, you will use the main navigation buttons to set up your learning experience:

MISSION

This is your academic starting point. Clicking here allows you to highly customize your study session. You can filter and select the exact **Subject**, the specific **Chapter**, and the **Type of Questions** (e.g., Multiple Choice vs. Structured) you want to revise.

ENGAGEMENT MATRIX

Once your mission is set, you visit the Engagement Matrix to choose your reward! Here, you select which **short arcade mini-game** you want to play. Every time you strike a correct answer during your mission, this chosen game will activate for a 10-second burst of fun.

AURA STORE & INVENTORY

This is where your hard work pays off! Use your earned Aura Points to unlock real-world rewards pre-agreed upon with your parents. Once you accumulate enough points, purchase your desired reward, and it will be safely stored in your **Inventory** tab.

To claim your reward, simply show your Inventory to your parents. Upon their approval, click "**Redeem**", and the item will be cleared from your digital inventory.

 **Pro-Tip for Earning Points:** Maximize your Aura Points by answering correctly on your first attempt, as points are reduced during "correction mode". Before answering, always open the **Vault** to review materials like video presentations, podcasts, quizzes, and flashcards to ensure you master the topic completely!

WEAKNESS LOG

Crucial for Revision: This system automatically records any question a student answers incorrectly. Visit the Weakness Log to focus specifically on the areas you struggle with most without re-studying everything.

2. The Ranking Leaderboard (Aura Points vs. XP)

To keep the learning experience exciting and competitive, Aura Tycoon features a **Ranking Leaderboard**. It is important to understand how your progress is tracked here:

- **Aura Points (Top Right of Screen):** This is your "spending money." You earn these by answering questions correctly and performing well in the arcade games. When you purchase rewards in the Aura Store, these points will be deducted.
- **XP (Experience Points):** Every single Aura Point you earn is simultaneously converted and accumulated as XP. While your Aura Points will decrease when you buy items, **your XP will never drop**. XP preserves your total lifetime progress!

Why does this matter? It allows you to freely spend your Aura Points on real-world rewards without losing your hard-earned rank. The more accurate your answers and the better your gaming skills, the higher your XP climbs—allowing you to showcase your true mastery on the leaderboard!

3. How to Play (The Learning Loop)

- **The Study Vault (PREP):** On the first question, the timer is paused. Click the *Vault Link* to read study materials before the pressure begins.
- **Answering:** For subsequent questions, a shrinking timer bar challenges your quick recall.
- **Frenzy Mode:** A correct answer unlocks your chosen mini-game for 10 seconds to earn points!

4. The Arcade Games Directory

Space Attacker Goal: Defend the galaxy in a space shooter! Rules: Dodge and shoot 13 descending alien ships. Earn 5 Aura Points per hit. Lasers are capped at 3 shots per second to prevent spamming.	Bouncing Shield Goal: A fast-paced paddle and ball game. Rules: Bounce balls back into the arena. The difficulty escalates: 1 ball for 4 seconds, a 2nd ball at 6 seconds, and a 3rd ball at 7 seconds!
Meteor Storm Goal: Dodge deadly meteors & collect gems. Rules: Use touch or arrow keys to steer. Collect amber gems for +5 Aura each. One hit from a meteor ends the run instantly. You have a 2-second safe shield buffer when the game starts!	Lane Racer Goal: 3-lane top-down driving. Rules: Avoid traffic cones, trucks, and oil slicks. Collect Gems (+4 Aura), Nitro (speed boost), Shields, and Magnets!
